| TypeScript         | 3 months   |

## Working experience:

---

2023.02 – Present

### **UAB Setupad Technologies**

**Company website:** <https://reklama.setupad.com/>

**Position:** Wordpress Programmer

I have been working on website monetization, where my responsibilities include implementing and optimizing ad solutions across web products. My tasks involve ensuring effective ad placements and revenue performance across different resolutions. In this role, I successfully manage and integrate various monetization systems, adapting them to meet both technical and business requirements.

---

2022.06 – 2022.07

### **WOJS**

**Company website:** [wojs-przeprowadzki.pl](https://wojs-przeprowadzki.pl)

**Position:** JavaScript, TypeScript programmer (**Apprenticeship**)

During my apprenticeship as a UI Developer, I focused on component styling using Styled Components, ensuring precise replication of Adobe design layouts for all resolutions. In this position, I worked with TypeScript and implemented modern styling techniques to meet project requirements.

## Education:

---

2024 – 2026

**Branch of the University of Białystok in Vilnius**

**Field:** Informatics

---

2021 – 2022

### **Vilnius Technology Training Center**

**Qualification:** Junior Programmer

**Skills:** HTML, CSS, JavaScript, SCRUM, SQL, PHP, Git & GitHub, Visual Studio Code, ReactJS, NodeJS, Postman, Jira

---

2020 – 2021

**Vilnius Adam Mickiewicz Lyceum**

---

Secondary Education

---
