PROFILE

Motivated second-year Computer Science student with a strong foundation in software, backend development, datascience and machine learning. I am eager to learn new technologies and gain experience working as a IT specialist. I enjoy problem-solving, adapting to new challenges, and collaborating with others to deliver quality solutions.

TECHNICAL SKILLS

Programming Languages: C/C++ (OOP) - 4 years, Python(matplotlib, AI, machine learning) - 2 years, C#(Unity, Visual studio - 1 year, WEB (JavaScript - 2 years, HTML/CSS - 2 years, PHP - 3 months, Java - 1 year, Kotlin 6 - months, TypeScript - 6 months.

Tools & Technologies: Git, GitHub, VS Code, Visual Studio, React, Cisco Packet Tracer(Networking), Android studio, SQL, Integrating AI to projects, Unity, Blender.

SOFT SKILLS

- Problem-Solving
- Adaptability
- Creativity
- Teamwork

EDUCATION

Branch of the University of Białystok | Expected Graduation: 2027

GPA: 4.46 / 5.00 (from first year)

Relevant Courses: Object-Oriented Programming (C++, Java), Web Development (JS, HTML/CSS, React, PHP), Python, Data Structures(SQL), Algorithms, Databases (SQL), Networking(CST), Machine Learning.

LANGUAGE

Polish – Native
Lithuania – Good
Russian – Perfect
English – Good

PROJECTS

A-Smart-Archive-of-Student-Projects | [React/Typescript](#)
<https://github.com/DanielSuba/A-Smart-Archive-of-Student-Projects>

Intelligent archive of IT Student Projects that collects data from github repository and makes difficulty scoring based on information. Also integrated API of AI can evaluate provided documentation of these programs.

3-way-QuickSort, algorithm-dijkstra | [WEB](#)

<https://github.com/DanielSuba/3-way-QuickSort>

Sort based on dijkstra QuickSort and pathfinder(dijkstra + A*)

Calendar of cultural events | [C#/Visual Studios](#)

<https://github.com/DanielSuba/Kalendarz-zdarze-kulturalnych>

More complex note to save upcoming events.

Chaotic transformation of image, algorithm-tribonacci | [Python](#)

<https://github.com/DanielSuba/Chaotic-transformation-of-a-digital-image>

Program that encrypts images with 3 different ways and representation of working tribonacci algorithm.
